CYBER-BRIDGE CONSORTIUM SUCCESFULLY ORGANIZED THE 1st GENERAL ASSEMBLY MEETING

4th of November 2026, Alexandra Elena GOMOESCU

CYBER-BRIDGE Consortium successfully organized the 1st General Assembly Meeting of the Project: *"Building Cross-Border Cybersecurity and Compliance for a Safer Digital Europe – CYBERBRIDGE"*. The objectives of the Project are: Strengthening Cross Border Cybersecurity Collaboration and Threat Intelligence Sharing; Enhancing Compliance with European Union (EU) Cybersecurity Regulations; Strengthening the Resilience of Critical Infrastructure; Advancing Cybercrime Investigation Capabilities; and Strengthening Capacity and Collaboration through Training & Knowledge Sharing.

The CYBER-BRIDGE Project started on 1st of December 2025, has a duration of 36 months and it is co-funded by the European Cybersecurity Competence Centre (ECCC) through the Digital Europe Programme, within the DIGITAL-ECCC-2024-DEPLOY-CYBER-07 Call.

***The 1st General Assembly Meeting* was organized on the 4th of November 2026, in Limassol, Cyprus,** with **the option to participate online**. **Hosted by Elias Neocleous**, the meeting provided an important opportunity for partners to assess progress across the different areas of CTBER-BRIDGE and ensure that technical, research, pilot and dissemination activities remain aligned with the project's overall objectives.

The key areas of focus included reviewing the CYBER-BRIDGE project's progress and achievements, assessing the implementation of all Work Packages (WP1–WP6), and ensuring alignment with project objectives and KPIs. Attention was given to cybersecurity compliance architecture, compliance tools and certification frameworks, platform development, pilot testing, validation, training, and the dissemination and exploitation of project results, while identifying priorities and defining the next steps.

The event opened with a warm welcome and Dr. Mihai PAUN – Founder – I-ENERGYLINK thanked to all participants — both those attending in person and those joining online and made a Project description "***I would like to sincerely thank all participants for joining us, both in person and online. Your presence and contribution are highly appreciated. I wish everyone a successful and productive meeting, with fruitful discussions and valuable outcomes for the CYBER-BRIDGE project***."

The 1st CYBER-BRIDGE General Assembly Meeting Agenda covered the main activities, including the official welcome and introduction to the CYBER-BRIDGE project, presentations by consortium partners outlining their profiles, roles, and responsibilities, and an overview of the project's objectives, KPIs, Work Package structure, and resource allocation. Participants reviewed the status and achievements of each Work Package, discussed the **cross-border cybersecurity compliance architecture** and **CRA-related analysis**, and **explored the development of compliance tools**, certification frameworks, and the CYBER-BRIDGE platform. The Agenda also covered **technical demonstrations**, updates on pilot testing, validation and training, project impact and dissemination activities, followed by discussions on next steps and closing remarks.

The CYBER-BRIDGE project aims to strengthen cross-border cybersecurity cooperation across the EU, in alignment with key European regulations such as NIS2, the Cybersecurity Act, and the Cyber Resilience Act. It develops AI-powered tools and an integrated platform to support threat intelligence sharing, incident management, and regulatory compliance, helping SMEs, SOCs, critical infrastructure operators, and law enforcement improve cybersecurity resilience and collaboration.

The CYBER-BRIDGE Project gathers experts from Romania, Hungary, Greece, and Cyprus – nine Consortium Partners Organizations. The European Consortium Partners is coordinated by I-ENERGYLINK (RO) working together with BOLTONSHIELD HUNGARY KFT (HU), CERTH (GR), CLONE SYSTEMS (CY), ROMANIAN NATIONAL CYBERSECURITY DIRECTORATE (RO), ELIAS NEOCLEOUS (CY), EXIMPROD ENGINEERING (RO), GENERAL DIRECTORATE OF INTERNAL PROTECTION – DGPI (RO), and INTERNATIONAL HELLENIC UNIVERSITY (GR).

This Project has received funding from the European Union's Cybersecurity and Trust Programme under Grant Agreement no. 101249702
